

Ay190 – Worksheet 14
David Vartanyan
Date: February 26, 2014

1

I use `advect_prep` template from `ws11`. I account for upwind velocity and fill in the template.
Not much more to say.

Here's a figure 1.

We see a shock 150s in this frame where material piles up at $x \approx 50$.

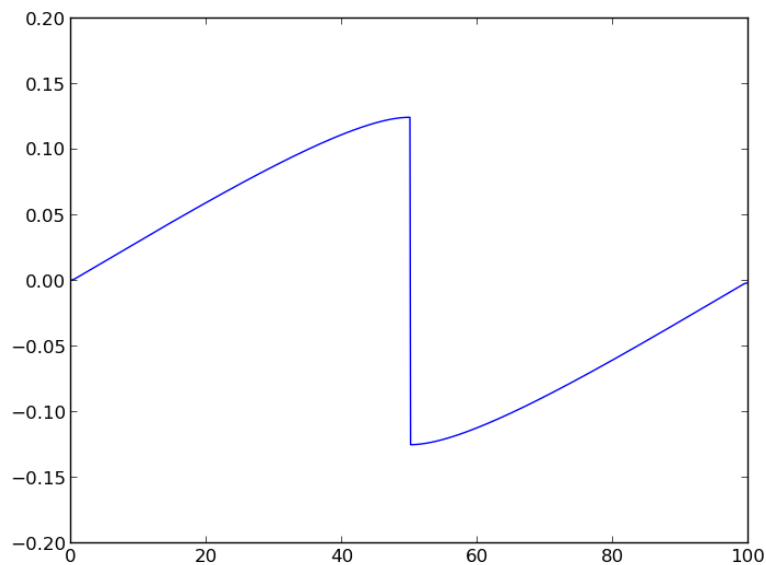

Figure 1: Advection Shock
